

Levante DC

SKU: KTV0100

EAN: 8445401009245

KEKAI, following its philosophy to help you create spaces at home to enjoy and relax with your family, presents you with “eco friendly” ceiling fans. Efficient, environmentally friendly and a “must” for the decoration of your home.

The Levante DC model from KEKAI has a DC motor which uses three times less than fans with conventional motors. What’s more, the design of its ultralight blades is extremely silent (48dB at maximum power) and barely makes any noise at all.

It is ideal for climatizing rooms with an area of approximately 13m² to 25m² and it has 6 speeds for creating different airflows.

It has a LED 18W technology light function separate from the fan function. Choose between the temperature with warm, cold or neutral light to adjust the lighting of your home at every moment of your life.

You can put your home in “summer mode” or in “winter mode” just by changing the rotation direction of its blades.

And what’s more, it can be controlled remotely and so you won’t have to get up from the bed or sofa to increase or reduce its speed or schedule its timer from 1h to 4h. Convenient, isn't it?

From now on, keep your home cool your way.

SPECIFICATIONS

- Colour temperature: 3000k 4000k 6000k
- Timer: 1h, 2h, 4h
- Fan speed: 80 / 110 / 120 / 140 / 165 / 190 rpm
- Motor type: DC
- Power: 55W
- Summer-winter function
- Dimensions: 105X38 cm
- Airflow: Max. 120.8m³/min
- Weight: 4.5 kg
- Blade material: Plywood
- Speeds: 6
- Sound level: Max. 48dB
- Room size: 13m² to 25m²
- Remote control
