

Black Siroco DC

SKU: KTV0115

EAN: 8445401009276

KEKAI, following its philosophy to help you create spaces at home to enjoy and relax with your family, presents you with "eco friendly" ceiling fans. Efficient, environmentally friendly and a "must" for the decoration of your home.

The Siroco DC model from KEKAI has a DC motor which is more efficient because its consumption is 70% lower than that of a conventional fan. A good option for reducing your energy bill, isn't it? What's more, the design of its ultralight blades is extremely silent (45dB at maximum power) and its DC motor barely makes any noise at all. It is ideal for climatizing rooms which have an area of approximately 13m² to 25m² and it has 6 speeds for creating different airflows. It has a LED 18W technology light function separate from the fan function. Choose between the temperature with warm, cold or neutral light to adjust the lighting of your home at every moment of your life (adjustable intensity). You can put your home in "summer mode" or in "winter mode" just by changing the rotation direction of its blades. And what's more, it can be controlled remotely and so you won't have to get up from the bed or sofa to increase or reduce its speed or schedule its timer from 1h to 4h. Convenient, isn't it?

Don't forget to connect your Siroco DC fan to Alexa, Google or Siri via TUYA APP.

Home automation has reached your house. New times are coming and it's a breath of fresh air.

CE EMC LVD RoHS

SPECIFICATIONS

- Colour temperature: 3000k 4000k 6000k
- Timer: 1h, 2h, 4h
- Fan speed: 80 / 110 / 120 / 140 / 165 / 190 rpm
- Motor type: DC
- Power: 55W
- Summer-winter function
- Dimensions: 132x40.
- Airflow: Max. 142.3m³/min
- Weight: 5 kg
- Blade material: Plywood
- Speeds: 6
- Sound level: Max. 45dB
- Room size: 13m² to 25m²
- Remote control. TUYA APP. SMART
